## MSTyr15 call for tender for IT contractors: Data Collection and Upload into ICSMS Storage

### Responses to questions about the tender, as at June 05, 2018

Date of publication of the call for tender: 31 May 2018. Deadline for tender: 7 June 2018 17.00

#### Summary of questions received and answers provided:

Ref.	Submission Date	Question	Answer
1	4 June 2018	<i>The data transfer will take place using a web tool. Does this web tool needs to be developed or is it an existing web tool (that needs to be adjusted for this purpose)?</i>	There is an existing webtool.
2	4 June 2018	<i>I had a look at the information that is provided via the ICSMS website, but couldn't find information regarding the required data transfer procedures. Are you able to give me some additional information on how data can be transferred to the ICSMS database (e.g. is there a secured API access available)?</i>	ICSMS has created a test server for this specific task.
3	4 June 2018	<i>The data is currently in a secure privately held database. Is this a relational database (e.g. MySQL) and is MS Excel used to input/output data?</i>	Yes, this is a relational database. MExcel can be used for this purpose though most data added has been via a dedicated App.
4	4 June 2018	<i>Roughly how many data fields need to be transferred?</i>	Enough cells to have exceeded the capacity of an .xls file. We have the equivalent of approx. 12500 rows of data, perhaps 100 columns plus linked photos and .pdfs
