Joint Action JAHARP2020-1 - WP1 Gas Cooking Hobs and Hot Plates

(Grant Agreement N° SI2.848971)

Call for Tenders for Testing Laboratories

Date of publication of the Official Call: 18 February 2022. Revised version published on 04 March 2022.

Summary of questions received and answers provided (to date - 04.03.2022):

Ref.	Submission Date	Question	Answer
1	23.02.2022	It is mentioned in the tender call some requirements need to be fulfilled to bid. These requirements are listed in the different sections. So, I would like to ask do you have checklist for the list of documents need to be submitted with the specific format to avoid any delays, which would be better for you also to process further.	A Checklist for tender specifications has been added in Appendix I. To further support we have also added a declaration for all the qualification criteria in Appendix II to ensure the bidders are aware that they all need to be met.
2	23.02.2022	Should labs be interested to bid for both Gas Hobs and Gas Space heaters tenders issued by PROSAFE for JAHARP2020-1 and JAHARP2020-3, can they make a common single bid or separate packages need to be submitted.	Separate packages need to be submitted in different emails each email having the title as requested in the tender specifications in Section 9.
3	23.02.2022	If a lab has collaborated with PROSAFE in other activities can some of the documentation be re-used or new ones needs to be sent	Each tender published is an independent procedure and thus new files need to be sent.
4	01.03.2022	In the tender it is mentioned to consider the tests relevant to safety. But the standard for rational use of energy for example in cookers is included. Could you please be more specific in tests relevant to safety?	The call tender mentions EN 30-2-1. We have analysed the question and it seems to have been included by mistake, so please disregard it in your quotation. A revised version of the Call for Tender without the above-mentioned standard has been published on PROSAFE website and circulated to the list of laboratories initially contacted.
5	01.03.2022	It is also mentioned that the Gas hotplates for use in leisure vehicles would be tested. Could you please state the kind of vehicles?	We are thinking about the normal types of leisure vehicles, i.e. campers, caravans and similar vehicles.
