## Joint Action JAHARP2020-3 - WP3

### USB Chargers

(Grant Agreement N° SI2.851409)

### Call for Tenders for Testing Laboratories

Date of publication of the Official Call: 08 March 2022.

Summary of questions received and answers provided (to date - 25.03.2022):

Ref.	Submission Date	Question	Answer
1	09.03.2022	<p>Is the Call for Expression of Interest received in December (17.12.2021) the same of this Call for Tender (08.03.2022)?</p> <p>Is the offer sent in response to the Call for Expression of Interest valid also for this Call for Tenders?</p>	<p>No, the two Calls are different. A new offer should be made in response to this Call for Tender tailored on the specifications presented in the available documentation.</p>
2	14.03.2022	<p>In relation to the revised test criteria with reference to clause T7, we believe there may be a mistake.</p> <p>According to EN/IEC 60335-1, section 21.2 is not an "impact test". The appropriate clause for the impact test would be 21.1 and not 21.2 as mentioned in Appendix 1.</p> <p>Can you please clarify?</p>	<p>Yes, the appropriate clause would most likely be 21.1 involving the spring hammer test. This is however a non-standard test and open to discussion and agreement with the selected testing laboratory. A pendulum impact test might also be discussed for example.</p>
