

MARKET SURVEILLANCE PROJECT TYRES 2015 (MSTyr15)

15000 tyres inspected
1500 inspections of technical documents
150 models of tyres

MSTyr15 is funded by the European Commission's Horizon 2020 programme and is coordinated by PROSAFE, a non-profit organisation established in 1991. PROSAFE's objective is to improve the safety of users of products and services in Europe.

The project is focused on enforcing Regulation (EC) No. 1222/2009 on the labelling of tyres.

Suppliers of tyres in Europe have to provide buyers with information regarding the performance of tyres offered for sale.

14 Market Surveillance Authorities from different EU Member States (BE, BG, HR, EE, FI, DE - RLP, LV, LT, LU, PL, RO, ES, SE) and Turkey have combined their efforts to ensure the effective enforcement of these regulatory measures for tyres.

RESPONSIBILITIES OF TYRE SUPPLIERS AND DISTRIBUTORS:

- To provide labelling information that indicates the class for the fuel efficiency, external rolling noise and its measured value, and the wet grip.
- To clearly display the sticker with the labelling information on the tyre or in its immediate proximity. The format of the sticker and its contents need to be in accordance with the regulations.
- When requested, to make available technical documentation to the enforcement authorities of the Member States.
- To provide the same information as on the label on their websites or catalogue or, when sales are made on the phone, to provide the customer with the label information.
